**2026 International Conference on Diagnostics in Electrical
Engineering (Diagnostika)**

2-4 September 2026

prof. Ing. Pavel Trnka, Ph.D., MBA
General Chair

Invitation

On behalf of the Organizing Committee, I am delighted to invite you to the International Conference on Diagnostics in Electrical Engineering (Dagnostika), held in the beautiful city of Pilsen, Czech Republic, from September 2-4, 2026.

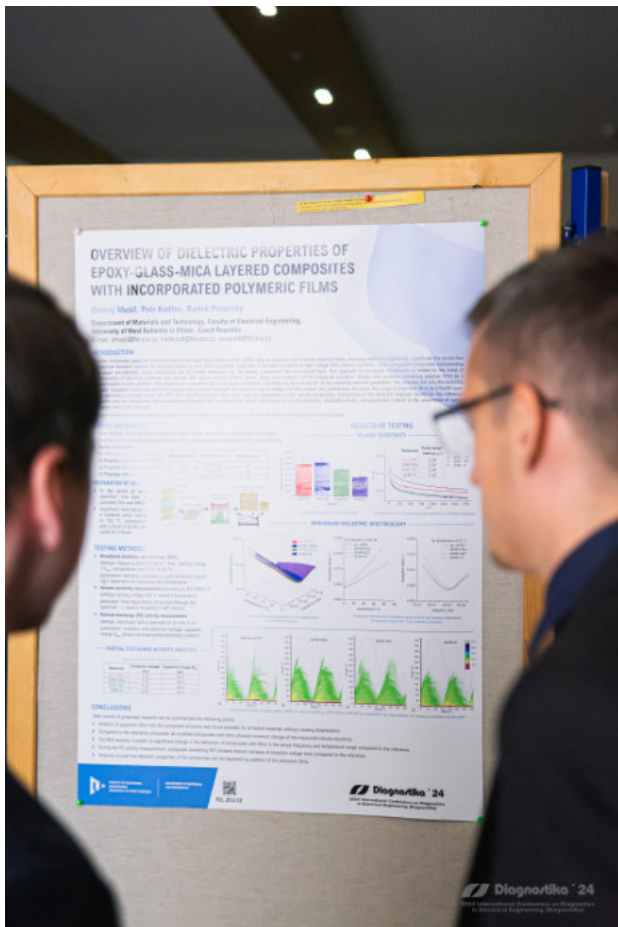

Our goal is to once again provide a platform for experts from academia, industry, and research institutes to share their latest findings and practical experiences. The conference will cover key topics in electrical engineering diagnostics, advanced measurement systems, and the manufacturing of electrical machines and appliances.

We look forward to welcoming you to Pilsen for what promises to be an inspiring and productive event.

Information for Partners

The Diagnostika conference has a rich history dating back to 1993, when the first edition was held. It is traditionally organized by the University of West Bohemia (UWB), Faculty of Electrical Engineering, in cooperation with the IEEE Czechoslovakia Section. Over time, it has evolved from an initially local event into an international gathering. Diagnostika, fully titled the International Conference on Diagnostics in Electrical Engineering (CDEE), is a biennial scientific conference focused on sharing the latest advancements and developments in the field of electrical engineering diagnostics. It serves as a key platform for scientists and experts actively involved in electrical engineering, materials science (including structure, features, and applications in electrical systems), and related diagnostic methods. In addition to its scientific program, the conference also offers a space for company presentations and exhibitions, thereby providing a valuable opportunity for professionals to exchange knowledge and research findings.
